DAILY GRID REPORT

Overview of device health and trends.

Thursday, Nov 20, 2025
C-001 — Demo Tenant

Devices with data 3 | With pending updates 2 | Unsupported OS 2 | Disks near full 1

HOW TO READ THIS REPORT

This snapshot shows how your devices behaved over the past 24 hours. Each device has charts for CPU/Processor, Memory, and Storage so you can spot what changed and when.

What to look for:

- **CPU/Processor:** brief spikes are fine; long stretches of high usage can mean something is stuck or overworking.
- **Memory:** if it stays high, apps may feel slow—restarting or closing apps can help.
- **Storage:** near 100% means the drive is almost full; free up space to avoid slowdowns.
- **Pending updates:** install these soon to keep devices secure and stable.

If something looks off, note the device name and time. The IT Actions & Notes at the bottom give a quick starting point for your IT team or service tech to address issues.

OPERATING SYSTEMS

Each device and the Windows version it is running. Unsupported versions need an upgrade to keep getting security updates.

DEMO-ONLINE	Windows 11 Pro 25H2
DEMO-STALE	**Windows 10 Pro 22H2**
DEMO-UNSUPPORTED	**Windows 8.1 Pro**

OS versions no longer receiving security updates are shown in red. Upgrade where possible.

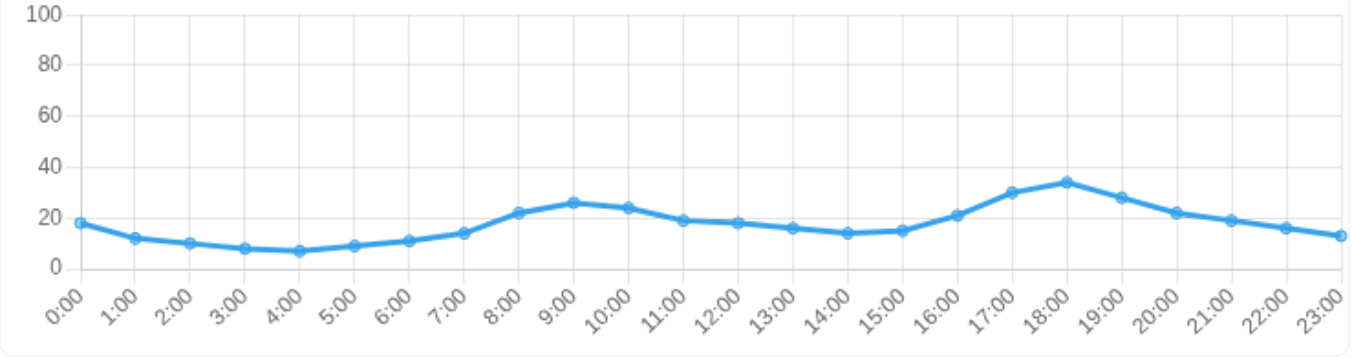
DEMO-ONLINE

Status: Online **Antivirus:** BitDefender
Last Seen: Today 9:45 AM ET **Pending Updates:** 3 updates **Uptime:** 3d 4h

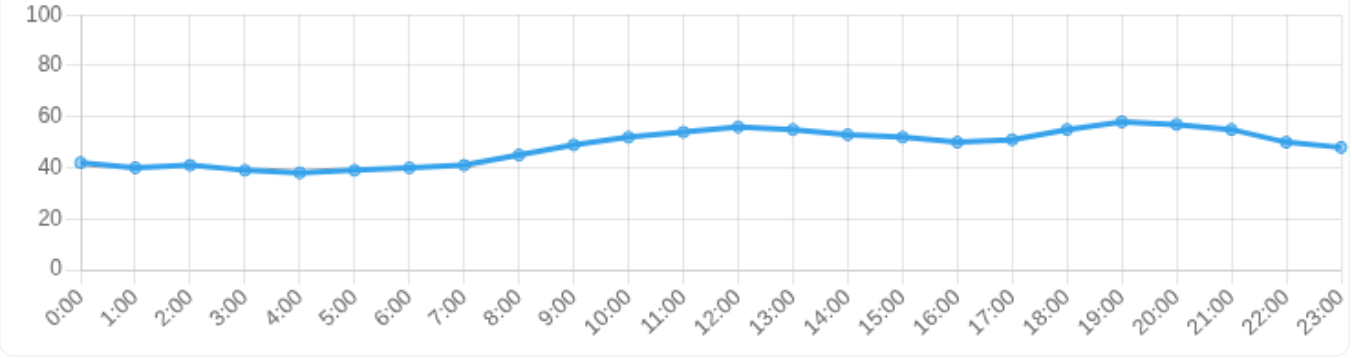
Pending update details:

- 2025-11 Cumulative Update for Windows 11
- Microsoft Edge security update
- .NET 6.0 security rollup

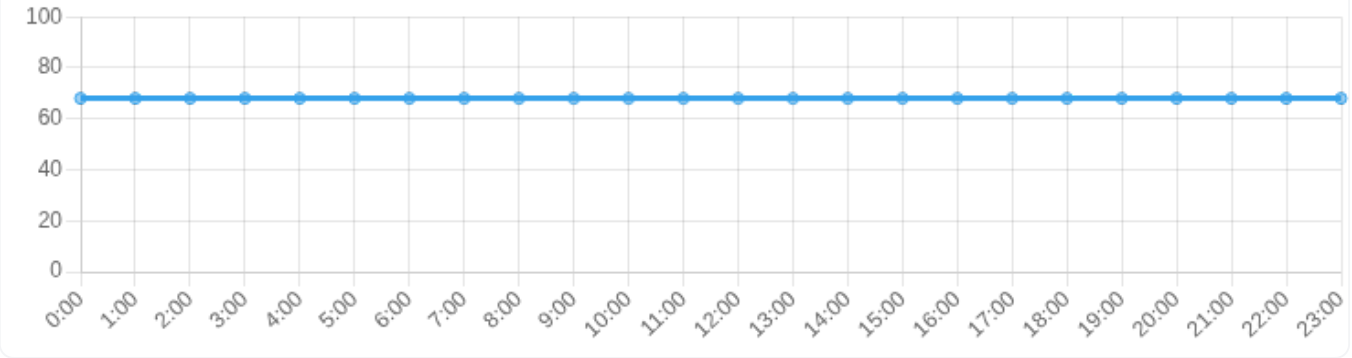
CPU % (last 24 hours)



RAM % (last 24 hours)



Disk % (last 24 hours)



Vulnerabilities:

CVE	Affected software/version	Description
CVE-2024-1234	Windows 10/11 — Print Spooler	Remote code execution via Print Spooler service.
CVE-2023-4455	FortiClient VPN 7.0.10 or earlier	Local privilege escalation in FortiClient update service.
CVE-2022-0901	Adobe Acrobat Reader 22.001 or earlier	Memory corruption when parsing crafted PDF.

DEMO-STALE

Status: Stale (last seen 30h ago) **Antivirus:** Windows Defender*
Last Seen: Yesterday 5:10 AM ET **Pending Updates:** 0 **Uptime:** 12d 6h

* We strongly suggest switching to a stronger and more secure AV (e.g., BitDefender, Sophos, Avast, SentinelOne).

No performance data available for the last 24 hours from the monitoring agent.

Vulnerabilities:

CVE	Affected software/version	Description
CVE-2023-4455	FortiClient VPN 7.0.10 or earlier	Local privilege escalation in FortiClient update service.

DEMO-UNSUPPORTED

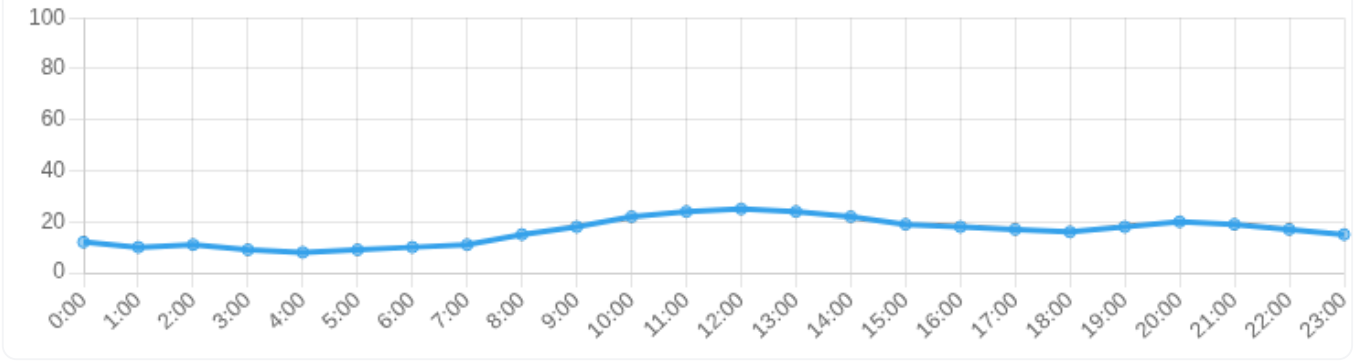
Status: Online **Antivirus:** Kaspersky Endpoint Security*
Last Seen: Today 8:05 AM ET **Pending Updates:** 1 update **Uptime:** 19d 2h

* We strongly suggest switching to a stronger and more secure AV (e.g., BitDefender, Sophos, Avast, SentinelOne).

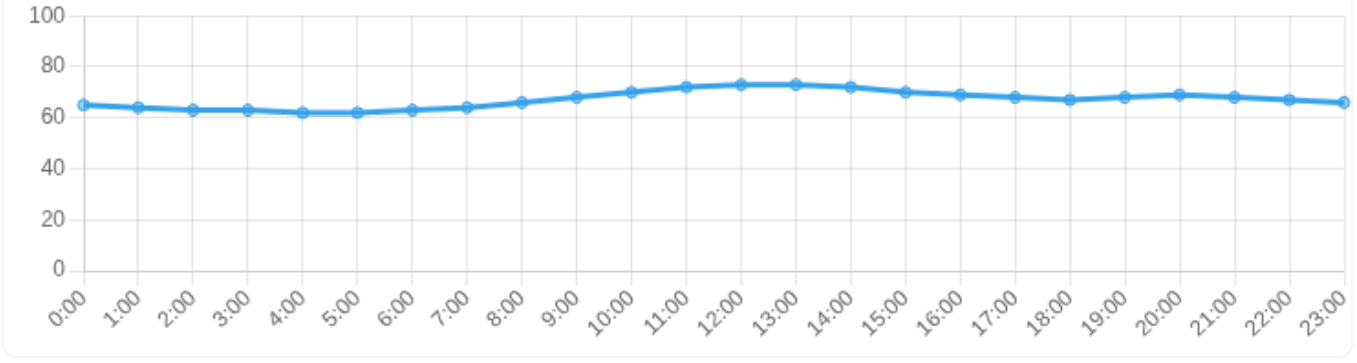
Pending update details:

- Windows 8.1 Extended Security Update (unsupported)

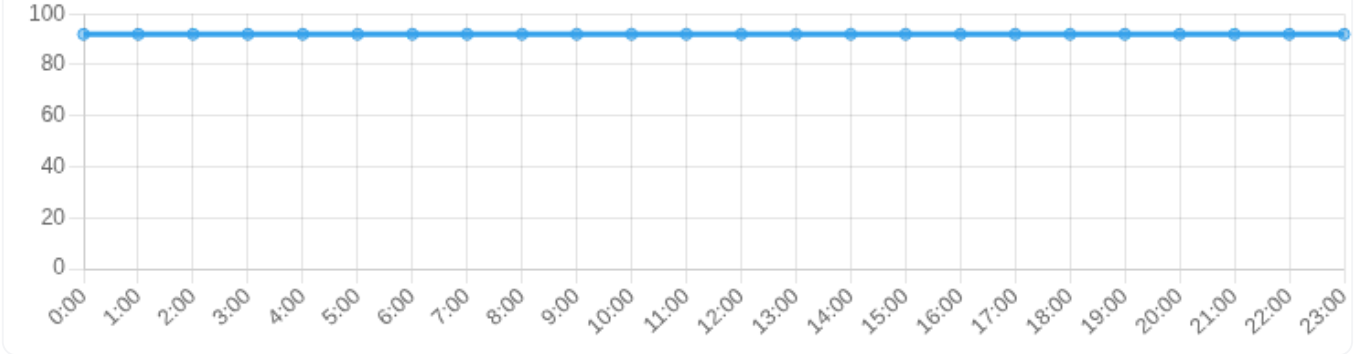
CPU % (last 24 hours)



RAM % (last 24 hours)



Disk % (last 24 hours)



Vulnerabilities:

CVE	Affected software/version	Description
CVE-2022-0901	Adobe Acrobat Reader 22.001 or earlier	Memory corruption when parsing crafted PDF.

IT ACTIONS & NOTES

- 1 device(s) have not checked in within 24h—verify the agent is running and the device is online.
- 2 device(s) report pending Windows updates—schedule installs and reboots where required.
- 2 device(s) are on unsupported Windows versions—plan upgrades to stay within security support.
- 1 device(s) have disks near capacity—free space or extend storage to keep at least 15% free.
- CVE-2024-1234 (DEMO-ONLINE): Disable Print Spooler where not needed; apply July 2024 cumulative update.
- CVE-2023-4455 (DEMO-ONLINE, DEMO-STALE): Upgrade FortiClient to 7.0.12 or later.
- Confirm monitoring agents remain installed and healthy after maintenance or imaging.
